Water Quality

Last Modified 13/06/2017 12:52:48

[Share this page](#)

Blackpool has a marine frontage of about 11.25 kilometres, all of which is protected from erosion by the [sea wall](#), which needs constant maintenance.

Blackpool's sea water passed strict new EU laws in 2015 with one stretch being classed as 'excellent'. Work continues to improve bathing waters further through the [Fylde peninsula water management partnership](#), [Turning Tides](#) and the [LOVEmyBEACH](#) campaign.

For further information please see the [Bathing Water](#) section of the Blackpool Council website.
