The Public Health Outcomes Framework (PHOF) *Healthy lives, healthy people: Improving outcomes and supporting transparency* sets out a vision for public health, desired outcomes and indicators that will help us understand how well public health is being improved and protected

The framework concentrates on two high-level outcomes to be achieved across the public health system, and groups further indicators into four 'domains' that cover the full spectrum of public health. The outcomes reflect a focus not only on how long people live, but on how well they live at all stages of life.

The [Public Health Outcome Framework - indicators at a glance](#) shows the current picture for Blackpool compared to England and any recent changes.
