Some people may find it easier to have this website read to them. Windows, Mac OS and Chrome OS all have inbuilt tools that can do this for you.

Listen to this website with Narrator for Windows 7

Windows comes with a basic screen reader called **Narrator**, which reads text on the screen aloud and describes some events (such as an error message appearing) that happen while you're using the computer.

Listen to this website with VoiceOver for Max OS X

In newer versions of Mac OS X there is assistive screen reading technology already built into the operating system called **VoiceOver**.

Listen to this website with Spoken Feedback on Chrome OS

In Chrome OS there is a synthesized speech feedback option built into the [accessibility features](#)
